

Slow Loris Outreach Week

A false belief that lorises will heal numerous different ailments fuels the illegal trade of lorises to use for **traditional medicine**.

Due to its cute looks, the slow loris is a popular target for both the **illegal pet trade** and the **photo-prop industry**. Participating in these activities is fuelling the illegal wildlife trade. Help stop this trade by not liking any YouTube videos featuring lorises, and don't pose with any lorises offered on the streets.

Lorises suffer heavily from **habitat loss** as the forests they live in are cut down. Deforestation is occurring at a larger scale than ever before, so we need to act **now**.

SLOW LORIS: WILD AND FREE
