

Slow Loris Outreach Week

23-29 October 2016

Did you know - there are so many ways you can go SLOW?

Slow lorises are rare and beautiful nocturnal primates that are almost extinct in the wild! Each year during Slow Loris Outreach Week, the Little Fireface Project (LFP) provides you with ways you can help to save the slow loris!

Speak up! Politely tell the uploaders why online videos are wrong, cruel and causing the species to go extinct!

Let your friends know that wild animals are not pets by using our Facebook banners and profile photos!

Organise an event to raise awareness and funds! Show an LFP film or hold a car boot sale with proceeds going to slow loris conservation!

Wear a slow loris t-shirt or carry a tote bag.

Labels! Check the labels of your favourite products for FSC or RSPO logos.

Own your own slow loris in the right way - through LFP adoptions or plushies!

Report animal cruelty to online sites such as Facebook and YouTube - the more reports they get the greater chance they will take action - find out how on our web site!

Improve your own environmental sustainability - drive less, walk more, consume less.

Support your local animal shelter and ethical breeders - we don't need wild animals as pets when there are so many domestic varieties looking for a loving home!

To learn more about slow lorises and to find out how to help save them, visit our website nocturama.org
